

Quality ABS & PLA Filaments - Extruded in the USA

Dimensional Accuracy < +/- 0.05mm

At Monofilament Direct our goal is to provide you with the most consistent ABS and PLA filaments. Monofilament Direct filaments are all extruded in the US to the most exacting standards available. Our filaments are made with 100% virgin resin and the highest quality materials. Each spool is inspected and controlled with the greatest care as if it was for our own printers. Our filament consistency leads to a more uniform print from start to finish.
